**“Red Carpet Facial”**

**No Pain, No Needles, No  
Downtime**

## WHAT IS JET PLASMA?

This extremely powerful device penetrates 14.88 kilovolts of plasma through the epidermis, into the dermal and subcutaneous layers of the skin stimulating high levels of collagen & remodeling the cellular structure from the inside out.

When Jet Plasma is mixed with oxide oxygen, ozone is created which kills surface bacteria & is anti inflammatory to aid in calming Keratosis, eczema, and rosacea.

Jet Plasma is used to tighten the skin, diminish wrinkles, hyperpigmentation, treat acne, scarring, stretch marks, aids product absorption that otherwise would not be possible without needle injection.
